# We Rebuild Hammers So You Can Get Them Back To Work

It is challenging when your hydraulic hammers are down and can't be rented to customers or used on job sites.

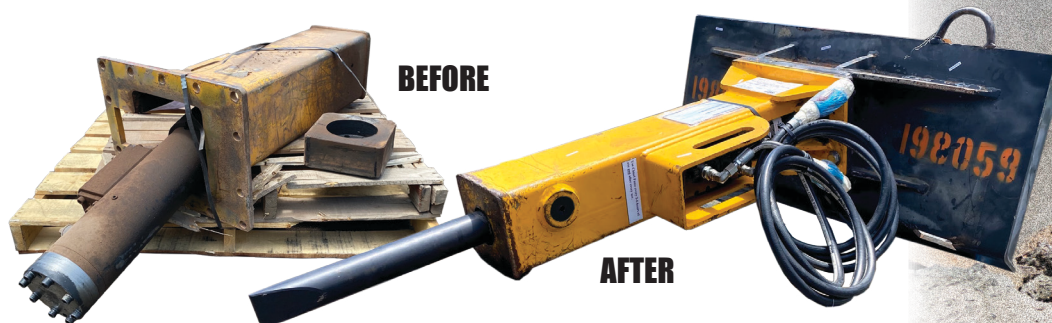

For more than a decade, Universal Impact Technologies has provided equipment rental companies and contractors with quality and reliable hydraulic hammer repair services to help them get their equipment back to work.

Universal Impact Technologies will:

- Pick up or arrange shipping from your facility.
- Under normal circumstances, we will tear down the hammer and email you a repair quote within three working days of the hammer arriving at our location.
- Provide a timeline for completion after parts are received.
- Repair and clean your hydraulic hammers. We also offer painting and decal services.

UIT has:

- Trained technicians to work on your hammers.
- An inventory of commonly used replacement parts and bits.
- Pick-up and delivery services.
